

Cloud Recovery — Disaster Recovery as a Service (DRaaS)

You must restore your critical enterprise applications quickly after a disaster—in minutes or hours, not days—to minimize lost revenue, damage to your brand and image, and reduced customer satisfaction.

MIS Sciences Corporation’s Cloud Recovery — Disaster Recovery as a Service (DRaaS) is a scalable, easy to use, and reliable solution for quickly restoring your virtualized enterprise applications after a man-made or natural disaster.

Using hypervisor-based replication technology, DRaaS replicates your virtual machines (VMs) to an offsite disaster recovery location for continuous data protection and disaster recovery.

Cloud Recovery — DRaaS: Features & Benefits

Simplicity	A single software solution for complete Business Continuity/Disaster Recovery protection. Simple installation in minutes and with no downtime.
Cloud Ready	MIS Sciences Corporation managed cloud capabilities. Hypervisor-based replication for VMware at your data center or your current colocation facility.
Scalable	Scales to support up to 5000 VMs.
Minimize Data Loss	Granular VM-level protection with no snapshots and no slowdown.
Minimize Downtime for Recovery	Aggressive service levels support recovery point objectives (RPO) from minutes and recovery time objectives (RTO) from one hour.
Confidence & Peace of Mind	Be confident that application recovery will work when you need it. Full BC/DR orchestration to provide automated failover, failback and non-disruptive isolated testing. One free annual failover test.
Networking Performance	Built-in WAN optimization for high-performance replication between your production site and your disaster recovery site.
No Storage Lock-in	Storage agnostic replication from Any Storage to Any Storage eliminates risk of storage lock-in.
Storage Performance	Tiered storage for applications-based performance requirements.
Application Consistency	Recover applications with multi-VM consistency groupings.

Cloud Recovery — Disaster Recovery as a Service (DRaaS)

Cloud Recovery DRaaS Architecture

- ✓ Hypervisor-based Replication
- ✓ Migration & Disaster Recovery
- ✓ Automatic VM Disk & Settings Conversion

- ✓ Enterprise-class protection
- ✓ No performance impacts
- ✓ No snapshots

- ✓ Continuous block-level replication
- ✓ Minimize data loss, meet SLAs

- ✓ Storage agnostic
- ✓ Any Storage to Any Storage
- ✓ Removes complexity & lock-in

Simple, Fast, and Scalable Disaster Recovery with MIS Sciences Corporation

- VM-level replication to the cloud for fast restoration of your critical enterprise applications at your DR site
- Complete disaster recovery solutions that include servers, storage, networking, and software
- Extensive disaster recovery expertise and skilled engineers to partner with you on your DR plan and processes
- 24x7 staffing available to assist you with disaster recovery following a disaster
